<sup>1</sup> The President's FY19 Budget Proposal was released before FY18 funding was finalized by Congress, so the President's budget compared it's numbers to FY17 appropriated funding levels.

Funding level is different from the level for "HIV Prevention" in the FY17 and FY18 bills, because this is funding only for DHAP and does not include funding for DASH.

<sup>2</sup> DASH is funded as part of the "HIV Prevention" line in both the President's Budget and the Congressional funding bills. Additional detail is need regarding the President's Budget to determine what the funding amount is for DASH.

<sup>3</sup> NIH received a \$3 b increase in FY18 funding. The office of AIDS Research and STD research is done across multiple Institutes; this will be updated when additional information is available.

<sup>4</sup>The National Institute of Allergy and Infectious Disease conducts clinical research on STDs. STD funding across institutes is reflected in the "NIH-Sexually Transmitted Diseases/Herpes Research" line

<sup>5</sup>Across multiple Institutes.
