9:00 – 12:00  M2 STD Surveillance – New Directions, New Priorities
Royal Dublin
Ryan Kreisberg, Maryland Department of Health
OBJECTIVES

1. Describe multiple challenges of STD programs across the nation.
2. Identify resources available to enhance STD prevention and control.
3. Identify strategies for utilizing community partners to better reach adolescents for STD testing.
4. Identify ways that public health departments can begin to rebuild trust with minority communities.
5. Identify successful strategies and innovative ideas for advancing condom availability/distribution programs.
6. Identify strategies that foster effective communication in the Disease Intervention Specialist client relationship and improve treatment and partner services outcomes.
7. Discuss successes, challenges, and impact of the changing landscape of STD services.
8. Identify potential opportunities for engagement with maternal and child health programs.
9. List skills to effectively name, respond to, and prevent racial micro-aggressions in personal and professional settings.
10. Identify ways that health departments can link MSM to systems of care within non-clinical settings.
11. Identify the social determinants of health that various populations in rural areas face.
12. Define the pros and cons of using social media and marketing to reach target populations.
