

# CHECKLIST: TELEHEALTH FOR ADOLESCENT SEXUAL HEALTH SERVICES

**National Coalition  
of STD Directors**

Questions? Email us:  
[adolescenthealth@ncsddc.org](mailto:adolescenthealth@ncsddc.org)

## EQUIPMENT

Do we have a device with audio/video capabilities on site, including headphones?

Are there medical supplies for personnel to use (e.g. thermometer, orthoscope, etc)?

## PRIVACY

Do we have a private space we can use?

What confidentiality policies are in place?

What does our state and local law say about minor privacy and consent? Have we considered that in our implementation plan?

## PROVIDERS & STAFF

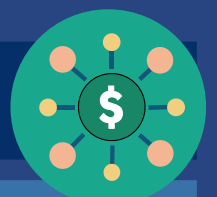

Do we have a health care provider, including one who can make referrals?

If not, do we have a community provider or company we can partner with?

Do we have a nurse for initial triage of students to determine if virtual visit is best? Do we need administrative staff support?

## FUNDING

Are there any grants that can support this?

What school district funds support this?

Who can we partner with who may have funding to support telehealth services?

## HEALTH EQUITY

How will we roll this out equitably? How will we make sure all students know how to use it and that it's for them even if their family struggles with health care access/costs?
